# IGUANAMED FIT AND SIZING DETAILS

**FYI – measuring in your skivvies will ensure a more accurate size reading**

The IguanaFit helps accentuate body shape and contour (without being tight). Our fit sits a bit lower on your waistline with a short/medium rise.

IguanaFit is designed for ultra comfort without ever compromising style.

### Time to Measure

#### Chest:

After disrobing place measuring tape under arm pits and extend the tape around the broadest section of your chest. The hard part is over.

#### Waist:

Easy One – place tape around your natural waistline – don't cheat!

#### Hips:

Almost Done – now stand with feet 2-4 inches apart and measure around the fullest part of your hips – write it down and you are done!
